Comfortable MongoDB, ExpressJs, Firebase, NodeJs,

Familier Redux, Stripe, JWT, Figma,

Tools VS Code, Netlify, Vercel, Chrome dev tools,

PROJECTS

SALVAGE YARD (Re-selling online market) - Oct 2022 [Live Link](#) [Clientside](#) [Serverside](#)

- It is a reselling smartphone marketplace where people can buy-sell their used products, and Buyers Can explore products based on brand. If something bad happens, they can "Report" that item.
- Buyers can book their preferred products, get their booked products in their dashboard, and pay through an International payment system (Stripe). They can also see the status of the booked products.
- Sellers can add, delete, and advertise on the home page products to attract customers and see their product status (Available/Booked/Paid). Also, the seller can get their customer info on another route.
- Admin can verify the truster sellers, and the buyer can see a green tick over the verified seller's name. If any buyer reports any product, the admin can remove that product and the seller.
- **Technologies:** ReactJs, React router dom, MongoDB, Tailwind, DaisyUi, Firebase, Vercel, NodeJs, JWT, Cors, ExpressJs.

REZA PHOTOGRAPHY (Photographer's website) - Oct 2022 [Live Link](#) [Clientside](#) [Serverside](#)

- It is an interactive website for photographers to handle their clients effectively and easily.
- The client will see all services with some details and prizes. They will book any service and add valuable reviews. All reviews will show in services individually and in the user's "My reviews" section.
- Users will add their services with full details, and they will update their previous reviews.
- When the user clicks on any photo in the service section, the photo will be the full size of their display.
- **Technologies:** ReactJs, React router dom, MongoDB, Tailwind, DaisyUi, Firebase, Vercel, NodeJs, JWT, Cors, ExpressJs.

CODE FORCE (Online Learning Platform) - Oct 2022 [Live Link](#) [Clientside](#) [Serverside](#)

- This online learning platform allows students to select their necessary courses and purchase them.
- If a user is logged in, he can purchase the course. Otherwise, he will redirect to the login page.
- They will find a full course detail PDF in the course detail option and also can download it.
- Users can log in via google, GitHub, or email also. There is also a blog and FAQ section.
- **Technologies:** ReactJs, React router dom, Bootstrap, React-to-pdf, React-Bootstrap, Firebase, Vercel, React-hot-toast.
